

OnePage Website

You've got a great little business, and now you need a great little website to promote it. OnePage Website gives you everything you need in one neat little package, and puts it all on one page for quick and easy navigation.

OnePage is a unique, one of a kind one-page website (technically, a web page) that is built with a navigational scheme that allows users to scroll up, down or sideways and perform all sorts of other tasks without ever leaving or reloading the page. This means your customers won't get distracted and you will have their undivided attention.

Who is it for?

OnePage is designed to appeal to tradespeople or owner-operator businesses as well as to those who are promoting an event or selling a single product or service. This type of site is used when there is no real use for a multi-page website.

What's included?

- Normally we have pages like 1. Home Page 2. News Page. 3. Services Page. 4. Products Page. 5. FAQ Page. 6. Contact Page.
- Customized to match your company's looks and colors
- All copy professionally written by staff sales copywriters
- ToolTip Technology hides handy pop-up messages
- Lightbox Technology allows images to be enlarged onscreen
- Contact section allows a message to be sent right from the site
